

Future Of
**RETURNABLE
PACKAGING**

COMPANY OVERVIEW

A snapshot of what we do!

With a wide range of sustainable packaging products for transportation & storage, **Stack Track India Pvt. Ltd.** offers a complete packaging solution in 'returnable packaging' by providing efficient distribution, handling, and warehousing of products.

Our range of sustainable products like Foldable Large Containers, PP Boxes and Collapsible Bins are cost-effective that reduce the packaging costs for customers. The administrative procedures, retrieval and quality assurance of our returnable pallets and containers are managed in a closed-loop system and are supplied on a rental basis that allows our customers to focus on your core business.

With the sole responsibility of maintaining the optimum condition of all equipment, we also focus on bringing down the overall impact on the environment by improving environmental sustainable packaging. At the forefront of the packaging industry, Stack Track India Pvt. Ltd., aims to find innovative solutions in returnable packaging, a segment that has great potential for profitability and rapid return in Supply Chain Marketing.

RETURNABLE PACKAGING

Protection. Longevity. Cost-effective.

Our understanding of Returnable Packaging in simple words is - packaging that can be used multiple times. The main use is to safely move materials or products.

The Reusable Packaging Association defines returnable packaging as “pallets, bins, tanks, intermediate bulk containers (IBCs), reusable plastic containers (RPCs) and other hand-held containers and totes, trays and dunnage that move products efficiently and safely through supply chains”.

Returnable or reusable packaging, thus, can be understood as durable packaging meant for multiple uses in a closed-loop system - a system in which materials are recycled and reused rather than discarded. This type of packaging can be used internally to move products efficiently and safely throughout the supply chain, from one process to another or different areas of the plant for storage or future processing. It can include pallets, racks, bulk containers, hand-held containers and dunnage made of materials like plastics, injection moulding and textile-based protective packaging that are durable and designed for multiple uses.

PACKAGING AS UNIQUE AS YOUR PRODUCT

01

REDUCES PACKAGING COSTS
(Cost-effective & profitable)

02

EXTENDED LIFECYCLE
(Lightweight, robust, secure)

03

MINIMISES PACKAGE MATERIAL WASTAGE
(Environment-friendly)

04

SIMPLIFIES PRODUCT TRACKING
(Manual & automated tracking)

05

WORKS WITH AUTOMATED EQUIPMENT
(Intuitive, user-friendly)

06

LOWERS HANDLING DAMAGES
(Prevents dust, dirt & moisture)

07

CLEANROOM COMPLIANT
(Clean & Organised)

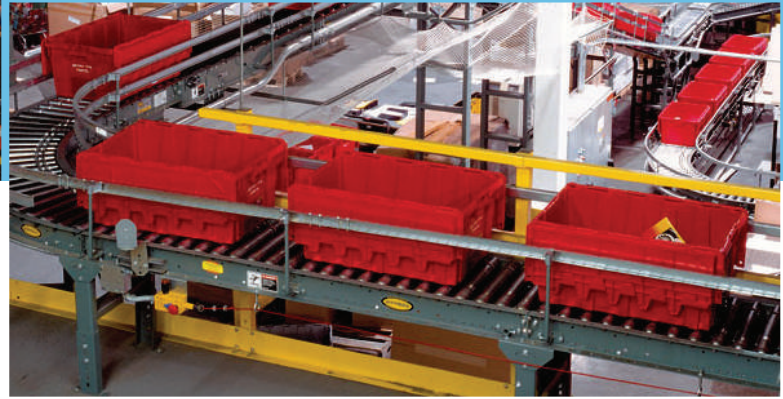

08

TRANSPORT EFFICIENT
(Customisable as per environment)

09

FASTENS PACKING & UNPACKING PROCESS
(Efficient, fast & ergonomic)

OUR SOLUTIONS, NOT JUST PRODUCTS

Foldable Large Containers

Our foldable large containers guarantee solid durability and are an ideal fit for bulk packaging needs. These containers can be easily folded and stacked, thereby saving a lot of time, cost and space and are sure to meet the needs of several industries like pharmaceutical, poultry, automotive, appliance, aerospace, bakery, produce, apparel and electronics etc. They offer the strength and rugged durability demanded in today's material handling and distribution systems throughout your supply chain.

Our returnable, reusable, and sustainable totes are user-friendly and make the process of product management easier. These boxes and totes are made from corrugated plastic that provides excellent product protection. They are strong, long-lasting, have amazing stacking strength and are available as per the drawn standards - in Injection Moulded / Roto Moulded / VDA Standards / Polypropylene / HDPE and UHMW (Engineered Plastics).

Boxes & Totes

Collapsible Bins

Collapsible bins as the name suggests have the ability to collapse into several folds, have a quick set-up and are easy to store. They are also called knock-down containers or knock-down bins that are perfectly engineered for durability and longevity. These are transport-friendly bulk distribution solutions that can be easily stacked and are ideal for saving space for storage and transportation.

STEPS OF POOLING SERVICE

We ensure providing our customers receive high-quality pallets through the following steps:

We issue high-quality pallets and containers to manufacturers.

Then, materials are loaded onto our pallets and into our containers and shipped to the manufacturers.

Customers can easily report and manage pallets and container transactions.

Goods arrived are handled more efficiently, reducing labour costs and product damage. Empty pallets are picked up by us or a third party

Empty pallets are received and returned to our service centre.

We inspect and repair returned pallets and containers to prepare them for reuse.

WHY

INDIA PVT. LTD.?

As different industries require different packaging and storage solutions, we provide our customers with comprehensive, innovative and sustainable packaging solutions for transportation and storage customised as per industry-specific requirements.

Quick turnaround time
